PROFESSIONAL SUMMARY

Information Systems student and junior full-stack developer based in Addis Ababa, Ethiopia. Skilled in building modern web applications using **React/Next.js** and **FastAPI**, with experience in authentication and cloud deployment on Render and Vercel. Focused on writing clean, scalable code and delivering fast, secure, and user-friendly applications. Interested in full-stack development and artificial intelligence, with a strong commitment to continuous learning and software engineering best practices.

TECHNICAL SKILLS

Languages JavaScript, TypeScript, Python, SQL
Frontend React.js, Next.js, Vite, Tailwind CSS, HTML5, CSS3, Responsive Design
Backend FastAPI, Node.js, JWT Auth, bcrypt, SQLAlchemy
Databases PostgreSQL, SQLite, MySQL
Tools Git, GitHub, Vercel, Render, VS Code
AI / ML LangChain, Groq API, Hugging Face, RAG pipelines

FEATURED PROJECTS

Secure Authentication System 2026 · Full-Stack
FastAPI · React (Vite) · SQLite · JWT · Render · Vercel

- Designed and shipped a production-ready auth system with registration, login, and account management flows.
- Implemented **JWT access & refresh token** rotation and protected API routes via authorization middleware.
- Hashed credentials with **bcrypt** and added **rate limiting** plus structured request logging to mitigate brute-force attacks.
- Configured CORS, environment-based secrets, and CI-ready deployment to Render (API) and Vercel (UI).
- 🔗 [GitHub Repository](#) 🔗 [Live Demo](#)

Personal Developer Portfolio 2025 · Frontend
Next.js · Tailwind CSS · Framer Motion · Vercel

- Built a fully responsive, accessible portfolio site with smooth page transitions and optimized Lighthouse scores.
- Implemented dark mode, SEO metadata, and dynamic project showcases sourced from a typed content layer.
- 🔗 michael-s-portfolio-seven.vercel.app

AI-Powered University Assistant Chatbot 2025 · AI / NLP
Python · LangChain · Groq API · Vector Search

- Developed a Retrieval-Augmented Generation (RAG) chatbot that answers academic and administrative queries for Addis Ababa University students.
- Indexed university documents into a vector store to deliver context-grounded responses and reduce hallucinations.
- Improved information accessibility for students by automating responses to repetitive support questions.

Coffee Shop Landing Page 2025 · Responsive Website
HTML5 · CSS3 · JavaScript

- Designed a clean, mobile-friendly landing page for a fictional coffee shop using pure HTML, CSS, and vanilla JS — no frameworks — to showcase products and boost engagement.
- 🔗 [GitHub](#) 🔗 [Live Demo](#)

EduTech Academy Landing Page 2025 · Responsive Website
HTML5 · CSS3

- Built a modern, fully responsive landing page for a fictional online education platform that highlights courses, surfaces testimonials, and drives enrollment with clear CTAs.
- 🔗 [GitHub](#) 🔗 [Live Demo](#)

EDUCATION

B.Sc. in Information Systems 2023 – 2027 (Expected)
Addis Ababa University, Ethiopia

Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Operating Systems, Web Development, Artificial Intelligence.

CERTIFICATIONS & ADDITIONAL

Retrieval-Augmented Generation (RAG) – LangChain, Pinecone, OpenAI API, Hugging Face, vector databases.
Languages: English (Professional), Amharic (Native). **Open to:** Frontend, full-stack, and AI internships or junior roles (remote or Addis Ababa).
